

The Cornerstone Design/Build Group, Inc.

Thank you for considering Cornerstone Design/Build Group for your new project. We specialize in custom home building, innovative three dimensional residential designs, engineering, and development. Take a moment to let us tell you more about what we do, and then let us show you how we can help you develop the most aesthetic, well-designed, and economical project possible.

The Cornerstone Design/Build Group is a firm comprised of well-seasoned construction professionals who are experts in providing all aspects of design and construction for your new home.

What Sets Us Apart

Here at The Cornerstone Design/Build Group, our passion is to make our clients ideas and visions become reality. Our aim is to form long-term relationships with each of our clients, by implementing the best design solutions and most efficient construction technologies to maintain your project on schedule and in budget.

We translate your vision into a feasible plan by bringing focused definition to your goals. The Cornerstone Design/Build Group specializes in balancing aesthetic considerations with structural and production requirements to provide you with the home you envision.

Our clients are our business, and we put them first. We carefully evaluate each of our clients' goals, specifications, and ideas, to meet every project objective on par with our customer's expectations.

We offer a full design/build service, from concept to move-in, blending traditional designs with millennium technology.

Our design services include unique custom designs, revisions to existing plans, 2D cad working drawings, and 3D views and renderings.

Other Services

- Strategic Planning and Process Analysis
- Detail Design and Drafting
- Assembly Plans and Specifications
- 3D Modeling and Rendering
- Interior Space Planning

Our multitalented team brings engineering, design and human-factors expertise to each project we undertake. We have a proven track record of designing homes, offices, and architectural features that seamlessly balance ergonomics, owner requirements and creative design to produce the most exclusive projects for our clients.

The Design/Build Advantage

Of the many advantages to the Design/Build process, one of the most important is that you will be working with one company to complete your home design, specifications, materials selection, room finish schedules, and construction of your new home. Everyone is reading from the same page, and is aware of all aspects of your project.

With the Design/Build approach, you can include only the things *you* would like, placed where *you* want them, and be able to visualize the end result utilizing our 3 D Technology before construction begins. We design our clients' perception into every project, thereby saving considerable expense compared to building a plan that is just "*sort of*" but "*not exactly*" what you envisioned as your new home.
